Profile

Programming and coding was always a cabalistic thing for me and I always wanted to reveal the mystic way it works. Being a biology teacher, It was somewhat hard for me to learn and switch the whole learning process. COVID 19 has an adverse affect on the whole teaching process and I took this as an opportunity. I have spended all the resource and strenght to learn coding and programming skills. Java become my first step, next was advancing it with advanced java and lastly frameworks such as hibernate, spring, spring MVC etc.

The joy of learning more and more helped me to learn HTML, CSS, Java Script, JQuery, AJAX, JSON, XML, MySQL etc. In the minimum stack of time, I have followed all the criteria needed to develop ones as Junior Java developer. The best part of programming is going through errors. Rectifying error is a exhaustive task for a programmer and always alarming one to not to do the same mistake twice. But in the mean time errors teach us a lot. Errors never bothered me, but not learning a day does. Programming fullfills all my learning requirements. Coding is my passion and I want to make this as my career.

Skills

HTML, CSS, JS : Static website, Dynamic website, LMS, Ecommerce, Social Media, Portfolio, Blog etc.

Core Java : OOPs, Inheritance, Abstraction, Encapsulation, Multithreading, Collections, Memory Related, Java 8, Java 9.

Advanced Java : Servlet, Jsp, JDBC, JPA, MySQL.

ORM Tool : Hibernate

Frameworks : Spring, Spring MVC, Bootstrap, Materializing CSS.

Android : Views, Layouts, Activities, Life-cycles, Map, Firebase, .

Graphic Design : Krita(Vector Design , Paint) , GIMP, Powerpoint.

Graphic Design : Blender (Modeling substance, environment, characters and abstract, Compositing, Animation, VFX, Motion Capture etc.)

Projects

Android Apps :

        LSTUD (A web View app)

        PUBG Wallpaper (Graphics self designed, realtime database using firebase)

Web Apps :

        Student Management System

        Bus Ticket Book

        LMS

        Blog

Education

Schooling from K.V. Samastipur, Bihar

Graduation from RANR College Samastipur, Bihar

Post-Graduation from IGMGS Kolkata, WB

Academic Performance : Above Average

Job Search Keywords

Salary : Above 1 lakh per annum

Willing to relocate : Yes

Work from Home Availability : Yes

Job Title : Software developer, Wep App developer, Full-Stack Developer, Java-Developer, Mobile App developer

Certifications

JAVA from Udemy

AWS Concepts Udemy

Android from Udemy

ADCA Diploma Cource from IMAS Samastipur, Bihar
